

Abul Hasan

929-438-1059 | Queens, NY | abul.k.hasan03@gmail.com | linkedin.com/in/abul-k-hasan/ | github.com/AbulHasan03

EDUCATION

Queens College — B.A., Computer Science

Flushing, NY | August 2021 – January 2026

Relevant Courses: Software Engineering, Machine Learning, Internet and Web Technologies, Data Structures, Theory of Computation, Computer Architecture, Databases — Coursework projects include implementations in C++ (backtracking algorithms) and Python (mathematical modeling & visualization)

EXPERIENCE

ZKTeco USA — Business Development Intern

New York, NY | May 2026 – Present

- Developed working knowledge of ZKTeco's product line including biometric readers, access control systems, and turnstile solutions to support informed client outreach.
- Conducted targeted prospect research to identify potential business clients across relevant industries and build out the sales pipeline.
- Drafted outreach communications to engage prospective clients, collaborating with senior leadership to align messaging with company objectives.

Liberty Tax — Apprentice

Queens, NY | January – April 2025, 2026

- Assisted preparing and filing 100+ tax returns for individuals and small businesses during peak tax season, ensuring accuracy and client confidentiality throughout.
- Conducted intake interviews to gather documentation, streamlining client wait times and improving overall office efficiency.
- Operated Liberty Tax's proprietary filing software to accurately input and process client tax data, maintaining attention to detail across a high-volume seasonal workload.

PROJECTS

TaskDeck github.com/AbulHasan03/task-deck | abulhasan03.github.io/task-deck/

JavaScript, Supabase, PostgreSQL, Gemini AI, Twilio, HTML5, CSS3 | 2026

- Built a full-stack Kanban project management platform featuring AI-powered board generation (Gemini), real-time direct and group messaging, a public community forum, board sharing with permission levels, and SMS reminders via Twilio — using vanilla JavaScript and Supabase with no framework or build step.

Wordle Clone github.com/AbulHasan03/wordle-clone | wordle-clone-qz9x.onrender.com

Python, Flask, JavaScript, HTML5, CSS3 | 2026

- Developed a full-stack daily word-guessing game with a Flask backend to synchronize daily words across all players and prevent client-side cheating, featuring color-coded feedback, on-screen keyboard tracking, and smooth tile animations.

LEADERSHIP & HONORS

- **Fellow, America Needs You** (2023 – 2025): Competitively selected for a 2-year career development and leadership fellowship for first-generation college students in New York.

SKILLS & INTERESTS

Technical Skills: Python, JavaScript, C++, Java, SQL, HTML5, CSS3, Flask, Supabase, PostgreSQL, Data Structures & Algorithms, OOP, RESTful APIs, Database Design, Machine Learning Fundamentals

Hobbies: Basketball, Chess, Golf
